

NEWSLETTER AUGUST 2018

A NEW MILESTONE FOR EPCO

Dear Partner,

We are very proud to announce the start of our new production line for panels in Bytom, Poland.

It took our founder, Pierre Meulders, one year to build this new factory on our new site.

As he did in Belgium before, he focused on a full automated process designed for the production of a wide range of sectional door panels, using the latest available technology and aiming for high flexibility and the best quality standards.

All rollforming tools have been tested and set in Belgium, to ensure a fast start in Bytom and 100% compatibility between products made in Poland and Belgium. The new factory will produce R/U, S/T and Ö panel series.

Our new sister company, EpcO Polska, is driven by a new team of people who received specific and intensive training in Belgium since August 2017 to be full operative. Piotr Wojewodski, our Site Manager, will lead the team.

The Sales team of EPCO has also been reinforced by the arrival of Milosz Seroka, coming from the panel industry, and who will focus on the Polish market and the Baltic countries.

This new factory gives us extended capacity and close access to Eastern Europe, and definitely represents a new milestone in the history of EPCO.

We are at your disposal to welcome you to discover EpcO Polska.

Sincerely Yours,

The EPCO Team.

From left to right, Yannick, Pascal, Christian, Pierre, Piotr.

The first 4 persons start here their 5th panel line in 20 years of experience ▼
